

## Overview

The Wave2Wave 1.25G SFP SX Transceiver is a compact, hot-pluggable optical module designed for short-reach Gigabit Ethernet and Fiber Channel applications. Operating at 850 nm with a high-performance VCSEL transmitter, it supports transmission distances up to 550 m on 50/125 µm MMF and 300 m on 62.5/125 µm MMF. Fully compliant with IEEE 802.3z, 1000BASE-SX, and the SFP MSA, the module delivers stable, low-latency connectivity for enterprise, campus, and data-center access networks. Integrated digital diagnostics (DDM) provide real-time monitoring to ensure reliable operation across the 0°C to 70°C commercial temperature range.
